

# Diesel Water Pump, 10 hp

This diesel water pump is a robust and reliable solution for various water pumping applications. Powered by a 10.0hp diesel engine, this pump delivers high performance and efficiency.

## Overview

### High-Performance Diesel Water Pump

This 10 hp diesel water pump provides a robust and reliable solution for high-demand water transfer applications. Engineered for efficiency and longevity, its self-priming design ensures quick start-up for immediate deployment in agricultural, construction, and industrial settings. The unit is built with a durable frame for enhanced portability and protection, supported by a high-capacity fuel tank for extended operational run times.

## Performance Specifications

### Engine Power

**10 hp**

Power Output

### Priming Mechanism

Self-Priming

### Model Identifier

WP30D

## Design & Features

### Design Features

- Robust heavy-duty frame
- High-capacity fuel tank
- Portable design
- Easy maintenance configuration

### Suitable Applications

Agriculture, Construction, Industrial
