

Diesel Water Pump

This diesel powered water pump is a robust and reliable solution for various water transfer applications. It is available in multiple models offering a range of performance characteristics to suit different needs.

Overview

Robust Diesel Water Transfer Solution

This diesel-powered water pump offers a robust and reliable solution for a wide range of fluid transfer applications. Engineered with a single-cylinder, 4-stroke, air-cooled, and direct-injection engine, these units provide consistent performance across multiple models. Designed for professional use, they feature versatile starting mechanisms and significant suction and lift capabilities to meet diverse industrial and agricultural requirements.

Technical Specifications

Engine Performance Metrics

9.8 kW

Max Power Output

26.8 N.m

Max Torque

499 cc

Displacement

Operational Capacity

Model	Max Lift (m)	Max Flow (m3/h)
DP50	15	22
DP80	18	35
DP100	19	40
DP150	22	150
DHP80	45	25

Starting Mechanism

Recoil, Electric

Logistics

Container Load Capacity

Model	20FT	40HQ
DP50	200	550
DP80	200	420
DP100	99	276
DP150	56	180
