

# Diesel Water Pump for Irrigation and Drainage

This diesel water pump is designed for efficient water transfer in agricultural and industrial applications. It features a robust diesel engine for reliable performance and a durable pump housing for longevity.

## Overview

### High-Efficiency Diesel Water Pump

This diesel-powered water pump is engineered for heavy-duty water transfer, making it an ideal solution for agricultural irrigation and industrial drainage needs. Built with a robust engine and a durable pump housing, it delivers reliable performance even when handling solids. Its self-priming capability and compact, portable frame ensure stable and efficient operation across diverse environments.

## Performance Metrics

### Key Performance Indicators

**80 mm**

Pump Size

## Technical Specifications

### Fluid Handling

Solids Handling • Self-Priming

<b>Pump Type</b>	Self-priming centrifugal pump
<b>Applications</b>	Agricultural Irrigation, Industrial Drainage, Water Transfer

## Design & Construction

### Construction Features

- Robust diesel engine
- Durable pump housing
- Sturdy protective frame
- Compact design for portability
