

# Diesel Water Pump Set, 4-Inch

This diesel water pump set features a 4-inch inlet and outlet diameter. It achieves a maximum flow rate of 96 liters per hour and a suction height of 8 meters.

## Product Overview

### Robust Diesel Water Management

The ZSH100P diesel water pump set is a reliable, high-performance solution designed for demanding water transfer applications. Engineered for both industrial and agricultural environments, this 4-inch pump is powered by a high-efficiency diesel engine ensuring consistent operation under load. With features like dual starting methods and a sturdy, portable design, it provides professional-grade results for heavy-duty water management tasks.
