

# Diesel Water Pump Set for Irrigation and Drainage

These diesel water pump sets feature a lightweight and compact design for easy maintenance. Ideal for agricultural and home use, they efficiently manage water transfer.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Diesel Water Pump Sets

These robust diesel-powered water pump sets are engineered for reliable performance in demanding agricultural, industrial, and emergency water management applications. Designed for environments where electricity is unavailable, they feature powerful diesel engines and durable pump housings to ensure efficient water transfer and drainage. With multiple inlet/outlet configurations available, these units provide the flexibility needed for various irrigation and fluid management tasks.

## Technical Specifications

### Performance Highlights

**120 m<sup>3</sup>/hr**  
Max Capacity

**90 m**  
Max Lift Head

### Model Specifications

Inlet/Outlet (mm)	Capacity (m <sup>3</sup> /hr)	Lift Head (m)	Net Weight (kg)
50	30	68	42
80	42	90	68
100	120	90	78

### Unit Dimensions

- 580 x 490 x 570 mm
- 580 x 490 x 630 mm

### Engine Models

178F, 186FA, 192F

## Applications

### Suitable Applications

Irrigation • Drainage • Agricultural • Industrial • Emergency Water Management
