

Diesel Welder Generator Set

This diesel welder generator set is designed for both welding and power generation. It features AC and DC outputs, along with adjustable current control for welding applications.

Product Overview

Professional Diesel Welder Generator Set

The DG8500WE is a robust diesel-powered welder generator set engineered to deliver consistent performance in demanding environments. This versatile unit provides both welding capabilities and supplemental power generation, making it an essential tool for site work and field repairs. Built for mobility and durability, it features an integrated frame and wheel system to ensure ease of transport across worksites.

Technical Specifications

Performance Metrics

50 Hz

Frequency

8.34 A

DC Output

Key Features

- Integrated oil alert system
- Adjustable current control for precise welding
- Dual AC and DC output configuration
- Heavy-duty mobile frame
