

Diesel Welding and Power Generation Unit

This diesel-powered welding generator is designed for both welding and power generation needs. It features a robust diesel engine, providing reliable performance and fuel efficiency.

Product Overview

Versatile Power and Welding Solution

This diesel-powered welding generator is engineered for both welding tasks and reliable power generation. Designed with a silent operation profile, it is suitable for home use and environments where noise reduction is a priority. The unit features a robust 100% aluminum alternator to ensure consistent performance and durability for various electrical applications.

Technical Specifications

Welding Current Range

50 A Min Current	140 A Max Current
----------------------------	-----------------------------

Power Output	1.8kW - 4.0kW
Alternator Material	100% Aluminum
AC Voltage Output	230 V
DC Output	12V 8.3A
Frequency	50 Hz

Features & Options

Safety Systems

- Oil Alert Lamp
- Fuse Protection

Design & Build

Silent Type • Portable Frame • Wheeled Design

Available Options

Remote Control, ATS (Automatic Transfer Switch), Digital Controller
