

# Digital Air Humidifier with Remote Control

This air humidifier uses a transducer to generate mist and features a UV degerming light for sanitization. It has a digital display for humidity and temperature readings, a water level indicator, and an essential oil box.

## ADDITIONAL IMAGES

## Overview

### Intelligent Air Quality Management

The HCX-H326T is a sophisticated tabletop air humidifier designed to create a healthy and comfortable environment in both residential and office settings. Featuring an 8L large-capacity tank and an intelligent pumping system, it provides consistent mist output for spaces up to 40 square meters. With integrated digital controls and optional UV degerming, it ensures the air you breathe is both humidified and sanitized.
