Product Overview

Professional Air Velocity Measurement

This digital anemometer is a professional-grade measuring tool designed for accurate wind speed and temperature monitoring. Featuring a compact, handheld design, it provides real-time, maximum, and average wind speed readings, making it ideal for HVAC technicians, meteorologists, and outdoor enthusiasts. With a backlit LCD display and selectable measurement units, it ensures reliable performance in diverse lighting conditions and environments.

Measurement Capabilities

Measurement Modes

- Current
- Maximum
- Average

Wind Speed Range	30 m/s
Temperature Range	-10 to 45°C (14-113°F)
Supported Wind Speed Units	m/s, Km/h, ft/min, Knots, mph

Technical Specifications

Display

LCD • Backlight

Power Supply	3V CR2032 Battery (Included)
Power Management	Auto/Manual power off
