

Digital Audio Optic Fiber Cable

This optic fiber cable is designed for superior digital audio transmission. Its durable construction and gold-plated connectors ensure optimal signal transfer and compatibility with many audio devices.

Product Overview

High-Performance Optical Audio Connectivity

This premium optical audio cable is engineered for superior digital sound transmission, connecting audio components like CD/DVD players, gaming consoles, and home theater systems to receivers and processors. Featuring a high-quality optical fiber core and 24K gold-plated connectors, it ensures a distortion-free, pure audio stream. Its durable, tear-resistant PVC construction is built to withstand rigorous daily use, including twisting and stretching, while maintaining optimal signal integrity.

Technical Specifications

Supported Audio Formats

- Uncompressed PCM audio
- Dolby TrueHD
- Dolby Digital Plus
- DTS-HD High Resolution Audio
- LPCM
- Compressed 5.1 Surround Sound
- Compressed 7.1 Surround Sound

Heat Resistance	135 °C
-----------------	--------

Connector Type	Toslink
----------------	---------

Build Quality

Construction Features	24K Gold-plated connectors, Corrosion-resistant, Tear-resistant PVC jacket, Optical fiber core, Flexible design
-----------------------	---

Compatibility

Compatible Devices

- Sound bars
- Gaming systems
- LCD flat-panel TVs
- Blu-Ray/DVD players
- Home theater receivers
- Preamplifiers
- Audio processors
- DAC
- Satellite/cable boxes
