

Digital Battery Tester for Standard and Rechargeable Batteries

This digital battery tester quickly determines the charge level of batteries. The display scale indicates charge levels in three colors: green for full, yellow for low, and red for flat.

Product Overview

Professional Battery Diagnostics

This digital battery tester provides a reliable solution for assessing the charge levels of standard and rechargeable batteries. Designed to minimize waste, it allows users to determine if a battery still holds sufficient power for secondary devices, ensuring optimal resource management. Its intuitive interface provides clear, accurate readings, making it an essential tool for electricians and general maintenance professionals.

Technical Specifications

Supported Voltages	1.5V, 9V
Display Type	Digital Segmented Display
Measurement Precision	High-accuracy voltage detection
