

Digital Blood Pressure Monitor

This automated blood pressure monitor is designed for home use. It features an easy-to-read digital display showing systolic and diastolic blood pressure, as well as pulse rate.

Overview

Automated Blood Pressure Monitoring

This automated blood pressure monitor is designed for reliable home use, offering a convenient solution for regular health tracking. Utilizing advanced oscillometric technology, the device provides accurate measurements of systolic and diastolic blood pressure, along with pulse rate. Its user-friendly design includes a pre-formed cuff for easy application and comfortable inflation, making it suitable for daily monitoring routines.

Key Features

Measurement Metrics

0 mmHg

Systolic Blood Pressure

0 mmHg

Diastolic Blood Pressure

0 bpm

Pulse Rate

Technical Specifications

Measurement Technology	Oscillometric
Power Source	Battery
Memory Storage	Yes

Design

Cuff Design	Pre-formed
Display	Digital
