

Digital Body Composition Analyzer

This body composition analyzer accurately measures various body metrics. Its digital display allows for easy reading of results.

Overview

Advanced Body Composition Analysis

This Digital Body Composition Analyzer utilizes intelligent SENSE ON technology and ITO transparent electrodes to deliver precise health metrics. Designed for family use, the device automatically distinguishes between 4 different user profiles, making it an ideal tool for tracking fitness progress. It offers a comprehensive suite of measurements, including body fat, hydration levels, and muscle mass, all displayed on an easy-to-read digital interface.

Key Features

Core Functionalities

- Intelligent SENSE ON technology
- ITO transparent electrode system
- Automatic 4-user profile recognition
- High-precision 4 G-sensor array

Measurements

Body Composition Metrics

Metric	Range	Graduation
Body Fat	5% - 80%	0.1%
Body Water	10% - 80%	0.1%
Body Muscle	13% - 80%	0.1%

Physical Specifications

Maximum Capacity

180 kg

Max Capacity

Dimensions

340-330 x 19 mm

Division Accuracy

0.1kg / 0.2lb
