

Digital Body Composition Analyzer

This body composition analyzer accurately measures various body parameters. Its digital display provides easy-to-read results using advanced technology for comprehensive body composition analysis.

Overview

Advanced Body Composition Analysis

This digital body composition analyzer utilizes intelligent SENSE ON technology and ITO transparent electrodes to provide precise health metrics. Designed for both home and professional use, it automatically identifies up to four different users. The device offers a comprehensive health overview by measuring body fat, water percentage, and muscle mass with high accuracy.

Key Features

Core Features

- Intelligent SENSE ON technology
- ITO transparent electrode system
- Automatic user recognition for up to 4 users
- Multi-function health monitoring

Measurements & Performance

Weight Capacity

180 kg

Max Capacity

0.1 kg

Division

Composition Measurement Ranges

| Metric | Range | Graduation |
|-------------|-----------|------------|
| Body Fat | 5% - 80% | 0.1% |
| Body Water | 10% - 80% | 0.1% |
| Muscle Mass | 13% - 80% | 0.1% |

Technical Specifications

| | |
|-------------------|----------------------------|
| Sensor Technology | 4 high precision G sensors |
| Dimensions | 340-330 x 19 mm |
