

Digital Body Composition Analyzer with USB

This body composition analyzer provides accurate and comprehensive body analysis. It features a digital display for easy reading and a USB interface for data transfer.

Product Overview

Comprehensive Body Composition Analysis

This Digital Body Composition Analyzer is designed for precise health and wellness monitoring. Utilizing advanced ITO transparent electrode technology and high-precision G-sensors, it provides detailed insights into body fat, water, and muscle mass. With intelligent 'Sense On' technology and multi-user support, it is an ideal solution for tracking fitness progress at home or in a clinical setting.

Measurement Capabilities

Key Measurement Ranges

80 % Max Body Fat	80 % Max Body Water	80 % Max Muscle Mass
-----------------------------	-------------------------------	--------------------------------

Technical Specifications

Weight Capacity	180 kg
Measurement Division	0.1kg / 0.2lb
Dimensions	340 x 330 x 19 mm

Features

Key Features

- Intelligent SENSE ON technology
- ITO transparent electrode
- Automatic user recognition (up to 4 users)
- USB interface for data transfer

Metrics Tracked	Body Fat, Body Water, Muscle Mass, Weight
-----------------	---
