

Digital Body Composition Scale with Handheld Unit

This digital scale features a glass platform and a handheld unit. It may be used for measuring weight, body fat percentage, and other health-related metrics.

Product Overview

Professional Body Composition Analysis

This digital body composition scale is designed for precise health monitoring and analysis. Featuring a modern glass platform and a dedicated handheld unit, it provides a comprehensive view of body metrics. It is an ideal solution for fitness centers, clinics, or personal health management, offering an intuitive interface for tracking weight and body composition data.

Key Features
