Overview

Comprehensive Health Analysis

This digital body fat scale is designed for precision health monitoring, featuring a durable 6mm tempered glass platform and a high-capacity sensor system capable of weighing up to 180kg. Beyond simple weight tracking, the device provides advanced body composition insights, including body fat, hydration levels, muscle mass, bone density, and caloric needs. With support for up to 9 unique user profiles, it is an ideal solution for families or shared fitness environments.

Technical Specifications

Maximum Weight Capacity	180 kg
