Overview

Advanced Health Monitoring Solution

This Digital Body Fat Scale features 2.4G RF technology with a unique removable display that can be wall-mounted or placed on a table as a clock. Utilizing BIA biometric technology and four high-precision sensors, it provides comprehensive body composition analysis including weight, body fat, muscle mass, and BMR. Designed for family use, it supports memory profiles for up to 10 individual users.

Key Metrics

Primary Performance Metrics

180 kg

Weight Capacity

10 Profiles

User Memory

4 qty

Precision Sensors

Measurement Capabilities

Tracked Parameters

Body Weight, Body Fat %, Body Water %, Muscle Mass, Bone Mass, Visceral Fat, Basal Metabolic Rate (BMR), BMI

Display & Connectivity

The innovative removable display can be used as a standalone clock or mounted for easy eye-level viewing.

Display Features

- Removable 2.4G RF wireless display
- Dual-use display: Wall-hanging or Table-standing
- Integrated digital clock function
- Large LCD screen (91 x 44 mm)
- Auto-on and Auto-zero functionality
- Low battery and Overload indicators

Technical Specifications

Physical Dimensions

Component	Dimensions
Scale Body	319 x 319 x 27 mm
LCD Display	91 x 44 mm
Platform Material	Tempered Glass

Measurement Units

kg • lb • st

Sensor Technology

BIA Biometric Technology with High Strain Gauge Sensors

Power Supply

Battery Requirements

- Scale Body: 4 x AAA batteries
- Display Unit: 3 x AAA batteries
