

Digital Camera Battery 3.7V 900mAh

This is a high-performance lithium-ion battery designed for digital cameras. The 3.7V, 900mAh battery pack ensures reliable and long-lasting power.

Product Overview

High-Performance Camera Power

This 3.7V, 900mAh battery pack is engineered to provide reliable and long-lasting power for digital cameras. Built with quality components, it ensures consistent energy delivery for your photography sessions. The design prioritizes both optimal performance and safety, adhering to essential industry standards for electronic power sources.

Technical Specifications

Voltage	3.7 V
Capacity	900 mAh
Chemistry	Lithium-ion
Item Number	KQ-0937
