

Digital Camera Battery Replacement

Rechargeable lithium-ion battery with a 3.7V, 1000mAh capacity. This battery is designed as a compatible replacement for Fuji NP-50 devices.

Product Overview

Reliable Power Solution

This high-capacity lithium-ion battery is designed as a reliable replacement for compatible digital camera devices. Engineered for consistent performance, it provides a stable 3.7V power output with a 1000mAh capacity to keep your equipment running longer. Built with safety in mind, it is a dependable choice for professional photography needs.

Technical Specifications

Voltage	3.7 V
Capacity	1000 mAh
Battery Chemistry	Lithium-ion (Li-ion)
Model Number	KQ-NP50

Safety & Compliance

Safety Instructions

- Do not short circuit
- Prevent from heat
- Do not disassemble

Country of Origin	China
