

Digital Depth Gauge 0-150 mm

This depth gauge is made of hardened stainless steel. It has a digital display and delivers with an inspection report.

Overview

Precision Depth Measurement

This high-precision digital depth gauge is crafted from hardened stainless steel for long-term durability and accuracy. It features a clear digital display with an IP67 rating, ensuring protection against dust and water in demanding workshop environments. Designed for versatility, it supports both inch and millimeter measurements and includes essential functions like data hold and incremental measurement for streamlined workflows.

Measurement Capabilities

Measurement Range

150 mm
Metric Range

6 in
Imperial Range

Resolution

0.05 mm

Functions

Incremental Measurement, Hold Function, Power On/Off

Technical Specifications

Ingress Protection

IP67

Construction Material

Hardened Stainless Steel

Scale Finish

Satin Chrome

Power & Accessories

Included in Box

- Plastic storage box
- Inspection report

Battery Type

3V CR2032
