

Digital Display Hair Clipper with Ceramic Blade

This hair clipper features a digital display for monitoring battery level and cutting length. It is equipped with a ceramic blade and a 1200mAh lithium battery.

Product Overview

Professional Performance

This professional hair clipper is engineered for high-performance cutting, featuring a precision-crafted ceramic blade for smooth and efficient operation. Designed for versatility, it includes an adjustable trimming range suitable for various styling needs. The integrated digital display provides essential real-time feedback on battery levels and current cutting length, ensuring consistent results for both professional salon environments and home use.
