Product Overview

Professional Digital Hair Straightener

This professional-grade hair straightener features a high-end digital display and sensitive touch controls for precise styling. Engineered with advanced PTC plus NTC heating technology, it reaches optimal temperature in just 90 seconds. With a versatile 140°C to 220°C range and 9 adjustable heat settings, this device is designed to accommodate various hair types while ensuring smooth, even heat distribution.

Performance & Heating

Heating Speed

90 s

Heating Time

Temperature Range	140°C - 220°C
Temperature Gears	9 gears
Heating Technology	PTC, NTC

Physical Specifications

Heating Pad Materials

- Pulling Aluminum
- Tourmaline Surface
- High Temperature Ceramic Oil

Dimensions (L x W x H)	270 x 30.5 x 37 mm
Net Weight	370 g

Electrical & Controls

Control Modes

Main Switch • Heating/Cooling Button • Device Lock

Voltage

110-240V / 50-60Hz

Power

35 W
