

Digital Display Humidifier

This humidifier increases humidity in a single room or an entire building. It features a cylindrical spout for releasing mist and a digital display showing temperature and humidity levels.

Overview

High-Capacity Ultrasonic Humidifier

This professional-grade ultrasonic humidifier is designed for environments requiring consistent moisture control, featuring a substantial 23L capacity and a powerful 2000ml/hour mist output. Equipped with intelligent controls, including a remote and customizable humidity settings, it ensures optimal air quality for homes or offices. The unit also includes convenient features like a sleep night light, programmable timer, and automatic safety shut-off for peace of mind.
