

Digital Electronic Counter

This electronic counter counts events and pulses. Its digital display provides an easy readout of the count value for applications in industrial automation and manufacturing.

Overview

Digital Electronic Counter

This digital electronic counter is designed for precise event and pulse counting in various industrial and manufacturing settings. It features a clear digital display for immediate readout of count values, ensuring accuracy and efficiency in your automation processes. Built for reliability, it is an essential component for monitoring production lines and operational cycles.

Technical Specifications

Common Applications

- Industrial Automation
- Manufacturing
- Production Monitoring

Model Number	AHC3J-6
Device Type	Digital Electronic Counter
Function	Event Counting, Pulse Counting
