

Digital Evaporative Air Cooler with Adjustable Settings

This digital air cooler provides efficient cooling for homes or offices. It features a digital control panel for precise temperature and fan speed adjustments, along with a water tank, timer function, and air filter.

Overview

Efficient Cooling Solution

This digital evaporative air cooler is designed to provide effective and customizable cooling for indoor environments. Featuring an 8-liter water tank, it supports extended operation for up to 6.6 hours of continuous use. With adjustable speed settings, an integrated timer, and automatic oscillation, it offers a versatile solution for maintaining comfort during hot weather.

Performance Metrics

Max Fan Volume

380 m³/h

Max Fan Volume

Max Fan Speed

8.8 m/s

Max Fan Speed

Technical Specifications

Water Tank Capacity	8 L
Continuous Use Time	6.6 hours
Timer Duration	15 hours

Features

Fan Speed Settings	3
Oscillation	Automatic Horizontal
Key Features	Digital Control, Timer Function, Automatic Oscillation, Evaporative Cooling
