Product Overview

Ergonomic design for efficient garment processing.

Professional Fabric Steam Press

The SYP-8810D is an advanced digital fabric steam press iron designed for efficient garment care. Featuring innovative IMD technology with a touch-sensitive LED display, it provides precise temperature control across 5 fabric modes to accommodate delicate materials like silk to heavy-duty fabrics like linen. Built with a large non-stick surface and safety-focused features like auto-shutoff, it delivers professional-grade results with consistent steam distribution.
