

Digital Hand Grip Strength Tester

This electronic hand dynamometer measures grip strength with a digital display. Its adjustable handle ensures a comfortable fit for various hand sizes, making it suitable for clinical and sports applications.

Product Overview

Professional Grip Strength Assessment

This digital hand grip strength tester is designed for accurate measurement and monitoring of hand strength in clinical, fitness, and sports environments. It features an intuitive digital interface that records personal data and tracks grip power history, allowing users to compare current performance against previous records. The device supports personalized assessments based on age and gender groups, making it an essential tool for strength trainers and rehabilitation professionals.

Technical Specifications

Maximum Capacity	90 kg
Measurement Resolution	0.1 kg
LCD Display Size	52 x 22 mm
Power Supply	2 x 1.5V AAA Batteries

Features

Core Features

- Grip power measurement
- Digital display
- Personal data storage
- Grip power record history
- Historical performance comparison
- Age and gender-based result assessment

Design Features

Adjustable Handle, Digital Display, Portable, Clinical Grade
