

Digital Jewelry Scale with Flip Lid

This digital scale is designed for weighing jewelry and other small items. A flip-open lid protects the delicate weighing surface.

Product Overview

Precision Weighing Solution

The FS-Series Digital Jewelry Scale is a compact, high-precision instrument designed for accurate measurements of small items. Featuring a protective flip-open lid, it ensures the delicate weighing surface remains safe from damage during transport or storage. With its integrated back-lit display and support for four different weighing units, this scale provides professional-grade reliability for jewelers and hobbyists alike.
