

# Digital Laser Distance Meter

This digital laser distance meter provides accurate distance measurements using laser technology. It is suitable for various applications, including construction, surveying, and interior design.

## ADDITIONAL IMAGES

## Product Overview

### Precision Laser Measurement

This digital laser distance meter is a versatile and compact tool designed for professionals in construction, surveying, and interior design. It offers a wide range of calculation modes, including single, area, volume, and indirect measurements using the Pythagorean theorem. With its durable housing and intuitive interface, it provides reliable performance for various indoor and outdoor measuring tasks.

## Technical Specifications

Laser Class	Class 2
Laser Wavelength	620-690 nm
Laser Power	1 mW

## Measurement Capabilities

### Advanced Features

- Memory function
- Plus / Minus (+/-) function
- Measuring unit conversion
- Reference selection
- Angle stop (fold-out end piece)

### Optional Features (X40, X50, X60)

Tilt Measurement • Incline Measurement

Supported Modes	Single Distance, Area, Volume, Continuous (Min/Max), Indirect (Pythagorean)
