

Digital Laser Distance Meter

This compact laser distance meter is designed for measuring distances, areas, and volumes. It features a digital display and multiple measurement modes within a durable housing.

Product Overview

Professional Precision Measurement

This versatile digital laser distance meter combines advanced laser technology with a convenient wheel measurement mode to handle a wide range of professional tasks. Designed for efficiency, it offers rapid calculations for distance, area, and volume, making it an essential tool for construction, interior design, and layout planning. The device features a large, clear LCD screen for instant reading, ensuring accuracy and ease of use in diverse environments.

Laser Measurement

Laser Specifications

650 nm

Wavelength

1 mw

Max Power

Measuring Range	50 m
Accuracy	+/- 2mm

Wheel Measurement

Measuring Range	10 m
Accuracy	+/- 1%

Physical Specifications

Dimensions	129mm Height, 52mm Width, 29mm Depth
------------	--------------------------------------

Features

Measurement Modes

- Laser Distance Measurement
- Wheel Measurement for Irregular Objects
- Continuous Measurement (Max/Min)
- Area Calculation
- Volume Calculation
