

Digital MIG Welding Machine

This digital MIG welding machine is designed for professional welding applications. It features an advanced control panel with digital display and adjustable parameters for optimal welding performance.

Overview

Professional Digital MIG Welding Solution

The AMIG series is a specialized digital MIG welding machine engineered specifically for steel welding applications. Utilizing advanced MCU technology, this power source ensures precise control and consistent performance. It comes fully equipped with essential welding preferences including burnback, creep start, and synergic capabilities to enhance workflow efficiency.

Technical Features

Primary Application

Steel Welding

Control System

MCU Technology

Supported Features

Burnback, Creep Start, Synergic
