

Digital Motorcycle Instrument Cluster

This digital instrument cluster is designed for motorcycles. It displays speed, odometer, gear position, and voltage information.

Overview

Comprehensive Digital Instrumentation

This digital motorcycle instrument cluster is designed to provide riders with essential real-time data for safe and efficient vehicle operation. It features a clear, high-visibility display that consolidates speed, mileage, and critical system status into a single, compact unit. Engineered for durability and clarity, it is an ideal upgrade or replacement component for various motorcycle models.

Display Metrics

Speed Unit	km/h
Operating Voltage	12 V
Total Mileage	110092 km

Indicators

Warning & Status Lights

Turn Signal • High Beam • Neutral • Reverse

Gear Positions	Neutral (N), Reverse (R)
----------------	--------------------------
