

Digital Motorcycle Speedometer with Indicator Lights

Digital instrument displays speed and total distance. It includes indicator lights for turn signals, high beam, neutral, and reverse.

Product Overview

Digital Motorcycle Instrumentation

This digital automotive instrument is designed specifically for motorcycles, providing essential ride data in a compact, durable format. It features a clear digital display for speed and distance, alongside integrated indicator lights for critical vehicle functions. The unit is housed in a robust round black casing, ensuring both aesthetic appeal and reliable performance on the road.
