

Digital Photo Display

This digital photo display allows users to showcase their favorite photos without the need for printing. It provides a simple and elegant way to keep memories alive in homes, offices, or at events.

Overview

Advanced Reverse Radar System

This car reverse radar system utilizes wireless digital transmission technology to provide real-time distance feedback for enhanced vehicle safety. Designed for easy installation without the need for vehicle disassembly, it features a clear digital display showing obstacle proximity in meters. The integrated indicator bar offers a visual representation of distance, making it an essential component for modern car security and safety systems.

Key Features

Key Capabilities

0.3 m

Minimum Detection

Technical Specifications
