

Digital Picture Display

This digital picture display allows you to showcase photos without printing. It displays images in a rotating slideshow.

Overview

Advanced Vehicle Safety Solution

This advanced car reversing radar system is designed to enhance safety and convenience during parking maneuvers. It features a high-precision digital display that provides real-time distance feedback with clear readouts. With integrated voice prompts and an intelligent color backlight, the system ensures the driver is fully aware of their surroundings for a seamless parking experience.

Core Features

Key Highlights

2.5 m

Max Detection Distance

System Capabilities

- Real-time digital distance measurement
- Intelligent color backlight display
- Human voice distance reporting
- Accurate feedback for parking maneuvers

Technical Specifications

Product Category	Car Reversing Radar System
Safety Features	Distance Measurement, Voice Prompts, Visual Alerts, Vehicle Integration

Installation & Use

Installation

Easy Installation • Seamless Integration

Application	Vehicle security and safety systems
