Overview

Professional Digital Plasma Cutter

This high-performance digital plasma cutter is engineered for precision and efficiency across a variety of cutting applications. It features an intuitive digital interface for accurate current adjustments, ensuring consistent performance for demanding tasks. With a robust 60% duty cycle and versatile power handling, this unit is designed to provide reliable, long-term service for professional welding environments.

Performance Metrics

Key Performance Metrics

45 A

Max Output Current

4.8 KW

Input Power Capacity

60 %

Duty Cycle

Technical Specifications

Input Voltage	220V ±15%
No-load Voltage	300 V
Rated Output Voltage	96 V
Rated Input Current	21.8 A
Power Factor	0.8
Cutting Diameter Range	1-12 mm

Compliance & Protection

Protection Ratings	IP21S, Class F
