

Digital Programmable Timer Switch

This digital programmable timer switch automates the on/off cycles of electrical appliances. It features a digital display for easy time setting and programming.

Product Overview

Smart Automation Control

The TH-161 digital programmable timer switch provides precision control over the power cycles of your electrical appliances. Designed for indoor use, it facilitates energy conservation by ensuring devices only operate when needed. With a clear digital display and intuitive button controls, it offers a user-friendly solution for automated scheduling in both commercial and residential environments.
