Product Overview

Professional Satellite Alignment Tool

This digital satellite finder is a versatile, portable instrument designed for precise satellite signal alignment and analysis. It features a high-resolution 3.5-inch TFT LCD screen and supports DVB-S/S2 standards, providing real-time signal strength, constellation diagrams, and comprehensive spectrum analysis. The device also integrates CCTV camera testing capabilities, making it an essential, multi-functional tool for satellite installers and maintenance technicians.

Technical Specifications

Technical diagram showing the interface, ports, and navigation layout of the satellite finder.

Display Screen	3.5" TFT LCD
Input Frequency Range	950-2150 MHz
Input Level	-65 to -25 dBm

Key Features

Testing Capabilities

- AHD CCTV Camera Testing
- Spectrum Analysis
- Real-time Constellation Display

Interface Features

- Multi-lingual OSD
- User-friendly UI
- AV Output

Supported Standards

DVB-S, DVB-S2

Compliance & Quality

Documentation confirming adherence to international quality and safety standards.

Certifications

CE Certified • ISO Compliant
