

# Digital Satellite TV Receiver

This digital satellite receiver is fully compliant with Nordigll & DVB standards. It offers high-quality fixed and moving receiving capabilities, supporting multiple bandwidths with high-speed auto-scanning.

## Overview

### High-Performance Satellite Reception

This digital satellite receiver offers professional-grade reception capabilities, fully compliant with Nordigll and DVB standards. Engineered for versatility, it supports multiple bandwidths and provides high-quality fixed and moving reception. With a user-friendly interface and robust processing power, it is an ideal solution for reliable satellite television management.

## Technical Specifications

### Supported Bandwidths

- 6MHz
- 7MHz
- 8MHz

CPU Architecture	32-bit RISC CPU (216MHz)
Cache Memory	2K I-cache, 2K D-cache
UART Speed	115200 bps

## Media & Output

### Output Interfaces

CVBS • S-Video • YPbPr • RGB

Video/Audio Standards	MPEG-2 Video (MP @ML), MPEG-1 Audio Layer 1, MPEG-1 Audio Layer 2
Supported TV Systems	PAL, NTSC

## User Experience

### User Interface Features

- 16-bit true color OSD
- 4 layers of graphic
- Zoom in/out functionality
- 9-picture display

### Advanced Functions

EPG • Subtitles • Teletext (800 pages) • Native Games • Satco DX • OTA Update

### Scanning Capabilities

- High-speed auto-scanning
- Preset search
