Product Overview

Professional Digital TDS Water Tester

This handheld digital TDS meter provides a rapid and accurate assessment of water quality by measuring the total dissolved solids concentration in ppm. Designed for versatility and ease of use, it features a clear LCD interface with a hold function to ensure reliable recording of measurements. Its compact form factor makes it an essential tool for monitoring water purity in residential, commercial, or laboratory settings, including aquariums and hydroponic systems.

Technical Specifications

Measurement Unit	ppm (parts per million)
Power Source	Button cell batteries

Key Features

Functions

- Digital LCD display
- On/Off power control
- Hold function for data freezing
- Portable handheld design

Applications

Common Applications	Drinking Water, Aquariums, Hydroponics, Filtered Water, Bottled Water
