

Digital Terrestrial Television Set-Top Box

This set-top box receives and decodes digital terrestrial television (DTT) signals. It is designed for home entertainment systems and provides access to digital broadcast channels.

Product Overview

High-Performance Digital Reception

This Digital Terrestrial Television Set-Top Box is engineered to deliver high-quality digital broadcasts with comprehensive support for modern standards including DVB-T and DVB-T2. It features advanced decoding capabilities for MPEG-2, MPEG-4, and H.264 formats, ensuring compatibility with a wide range of broadcast signals. Designed for professional home entertainment integration, it offers robust management tools like channel editing and parental controls.
