

Digital Terrestrial TV Receiver

This digital terrestrial receiver is designed for receiving and decoding digital television signals. It features standard definition output and a user-friendly interface.

Overview

Digital Terrestrial Receiver

The DVT-4201 is a reliable digital terrestrial receiver designed for high-quality signal reception. Optimized for the EU and UK markets, this unit supports FTA (Free-to-air) broadcasting and MHEG-5 standards. Its compact 180mm plastic housing ensures it fits seamlessly into any home entertainment setup, while the inclusion of a USB port allows for easy software upgrades.
