

Digital Transmission Coaxial Cable

This coaxial cable is designed for digital transmission applications. Compliant with JIS standards, it provides reliable, high-quality signal transmission with low signal loss and high bandwidth.

Product Overview

High-Performance Digital Transmission

This digital transmission coaxial cable is engineered for reliable, high-quality signal integrity in demanding communication and data transmission systems. Compliant with JIS standards, it features a robust construction including a central conductor, insulation, braided shielding, and a durable outer jacket. It is an ideal solution for applications requiring low signal loss and high bandwidth.

Standards & Compliance

Standard Compliance

JIS Compliant

Construction Details

Cable Components

- Central Conductor
- Insulation Layer
- Braided Shielding
- Outer Jacket

Performance Characteristics

Key Benefits

Low Signal Loss, High Bandwidth, Reliable Transmission
