

Digital TV Antenna for Attic and Outdoor Use

This antenna is specially designed for receiving digital TV signals. Its log periodic element design ensures optimal performance, and its durable elements are anti-rust, waterproof, and weather resistant.

Product Overview

High-Performance Digital Reception

This versatile digital TV antenna is engineered for both attic and outdoor installations, providing robust reception for Full HD and digital signals. Featuring a log periodic element design, it ensures optimal performance and consistent signal quality. The construction utilizes anti-rust and waterproof materials, making it highly durable and weather-resistant for long-term outdoor use.

Key Features

Key Features

- Log periodic element design for superior performance
- Anti-rust, waterproof, and weather-resistant construction
- Supports Full HD and digital TV signals
- F connector output for enhanced shielding

Technical Specifications

Frequency Range

470 MHz

Min Frequency

862 MHz

Max Frequency

Impedance	75 Ω
VSWR (UHF)	<2.0
3dB Beam Width	UHF $\pm 15^\circ$
Polarization	Horizontal
Front/Back Ratio	25 dB
