

# Digital TV Broadcasting Receiver

This device receives and decodes broadcast signals for television display. It offers intelligent design, user-friendly operation, interference resistance, and unobstructed viewing.

## Product Overview

### Professional Broadcast Reception

This advanced Digital TV Broadcasting Receiver is engineered for high-performance signal decoding and reliable media playback. It combines a sleek, modern silver design with a user-friendly interface to ensure an intuitive experience for any professional setup. Built to handle complex broadcast environments, this device offers superior interference resistance and low threshold reception for uninterrupted, high-quality viewing.

## Performance Features

### Performance Metrics

**5036**

Series Model

### Core Advantages

Intelligent Design, User-Friendly Operation, Low Threshold, Interference Resistance, Unobstructed Viewing

## Technical Specifications

### Connectivity Options

- USB Port
- Power Input
- Front Panel Power Button
- Menu Navigation Interface

### Model Identifier

JS 5036
