

# Digital Uninterruptible Power Supply

This digital uninterruptible power supply (UPS) system provides backup power in case of a power outage. It is a three-phase input and three-phase output dynamic emergency power supply, suitable for critical applications requiring continuous power.

## Overview

### Professional Power Continuity

The CKF digital uninterruptible power supply (UPS) is a high-performance system engineered for critical power backup. It features a three-phase input and three-phase output architecture, ensuring reliable energy supply for sensitive industrial applications. Its robust design is housed in a professional-grade enclosure with an integrated digital user interface for monitoring and control.

## Technical Specifications

### Operating Metrics

**10 %**

Efficiency Rating

Input/Output Configuration	Three-phase Input, Three-phase Output
System Architecture	Dynamic Emergency Power Supply

## Design and Build

### Enclosure Design

- White professional cabinet
- Integrated ventilation system
- Digital control interface panel
