

Digital Uninterruptible Power Supply

This digital uninterruptible power supply is designed for critical applications. It features advanced power management and scalable architecture.

Product Overview

High-Performance Digital UPS

The CPTH digital uninterruptible power supply is engineered for critical applications requiring maximum uptime and protection. This unit delivers clean, reliable power to sensitive electronic equipment, effectively safeguarding against power disturbances. Its robust and scalable architecture makes it an ideal solution for data centers, industrial automation, and healthcare facilities where business continuity is paramount.

Application Areas

Suitable Industries

Data Centers, Industrial Automation, Healthcare

Key Features

Capabilities

- Advanced power management
- Robust protection against power disturbances
- Scalable architecture
- Clean power delivery
