

Digital Vernier Caliper with LCD Display

This digital caliper provides precise dimensional measurements for a variety of applications. Its water-resistant design and USB connectivity enhance usability in diverse environments.

Product Overview

Precision Measurement Tool

This high-quality digital vernier caliper features a full-screen design with a durable plastic head, engineered for accurate dimensional measurements in both imperial and metric units. It is equipped with a clear LCD display for easy reading and includes advanced features such as origin setting and USB connectivity for efficient data transfer. Designed for versatility, its water-resistant construction ensures reliable performance in diverse industrial and workshop environments.

Technical Specifications

Protection Rating

IP54 • Water Proof

Supported Units

- Millimeters (mm)
- Inches (in)

Measurement Range

150 mm

Data Connectivity

USB
