

# Digital Weather Station Clock with Radio-Controlled Time

This digital weather station clock features a radio-controlled clock with DCF/WWVB synchronization, time, date, alarm, and snooze functions. It measures indoor and outdoor temperature and humidity, with a temperature range of 0°C to +50°C (indoor).

## Product Overview

### Professional Weather Monitoring

This multifunctional digital weather station provides precise environmental monitoring combined with reliable timekeeping. Featuring radio-controlled synchronization, it ensures accurate time, date, and alarm settings automatically. Designed for both indoor and outdoor utility, it tracks temperature and humidity levels while offering a user-friendly interface with customizable display options.

## Technical Specifications

### Main Unit Power

- AC/DC Adaptor (Included)
- 3x AAA Batteries (Not included)

|                          |                                |
|--------------------------|--------------------------------|
| Indoor Temperature Range | 50 °C                          |
| Sensor Power             | 2x AA Batteries (Not included) |
| Unit Dimensions          | 17.3 x 2.2 x 12.5 cm           |

## Features

|                   |  |
